

British and Continental Ceramics and Glass / Thursday, 14th June 2018 / Lot 1419

LOT 1419

A large Mosanic Gallé style faience model of a cat, early 20th century, modelled seated with a smiling expression and green glass eyes, decorated with yellow and white hearts, fish and circles against a dark purple ground, painted factory mark to base, height 31.5cm, together with a smaller example in shades of red and pale blue, height 21cm (restoration).

Estimate: £60 - £100

Condition Report

Large cat - front left leg has had some restoration and there are small areas of restoration to the tips of both ears and to the side of one. There are a few areas of glaze flaking to base of legs and a small chip to base of tail. Otherwise ok. Small cat - extensive restoration to head, ears, both front legs and back right foot; evident with the discolouration of these areas. Long crack running halfway along the tail vertically up the leg and body, another running internally in a similar location and another across the front left leg. Some noticeable crazing to neck and leg areas.
