## Condition Report

595. The necklace is not currently fitted to the clasp and the ends of the clasp are rather chipped. There is some wear between the amber beads with a few resultant chips to the drill holes of some of the beads. Some of the beads also have some surface damage, chips and wear. The necklace would benefit from restringing. Some beads may have been added in the past in order to lengthen the necklace. The beads retain a reasonable degree of polish.
