Condition Report

680. Garnet and pearl pendant – one foil-backed garnet is missing and the pendant is rather tarnished. One of the blister pearls is rather grey, the other blister pearls are more silvery. The pendant would benefit from careful professional cleaning. Oval brooch – it is in generally good condition, though looks to be fairly heavily tarnished. The central green gem is probably a foil-backed pale green beryl, mounted in a surround of cultured pearls. Bohemian garnet pendant cross – the mount is base metal, the garnets are in good condition.
