

Cameras and Scientific Instruments / Thu, 7th November 2019 / Lot 1288

LOT 1288

An Art Nouveau stained and inlaid oak barograph with lacquered brass mechanism and recording drum, the bevelled five-glass cover and frieze drawer inlaid with copper sinuous stems and boxwood stringing, on bracket feet, length 42cm.

Estimate: £300 - £500

Condition Report

1288. Case - All case parts and inlay intact and in good condition although it would benefit from a good polish. Only fault found with case is that the base of the chart drawer is cracked.

Mechanism - Clock mechanism is running although not very well. It has not been dismantled but I think it is in need of a clean. The ink bottle has leaked (?) and is now stuck in place. This will need to be attended to to return instrument to original state.
