LOT 507

A moonstone and sapphire pendant in a cruciform design, mounted with five oval moonstones alternating with four cushion cut sapphires, length 4.4cm, on a gold neckchain, detailed '585', weight 2.1g, length 40.5cm.

Estimate: £200 - £250

Condition Report

507. The moonstone directly below the suspension loop has a fairly large chip to the edge of one side running across the back of the stone. This is noticeable without magnification when viewing the piece front on.

The other moonstones have some patches of heavier wear/surface abrasion which slightly impairs on the overall lustre of the stones when viewed at certain angles.

Two of the sapphires have surface chips to the table/facet edges, these are noticeable without magnification. Otherwise there are one or two tiny nicks to facet edges.

There is a small split to the back of the mount of the central moonstone.

General discolouration to the metal. The piece would benefit from a professional clean.

The neckchain appears to be in generally good condition.
