Condition Report

708. The sapphire is of pale colour saturation with a slight unevenness of colour. It is a largely clear stone with some minor feather like inclusions noticeable without magnification. A number of nibbles/chips to the girdle, particularly to the corners of the stone. Some discolouration to the mount which would benefit from a clean. A few tiny dents/scratching to the shank. A couple of the claws beginning to show signs of wear. Size of sapphire approx 2.05cm x 1cm x 0.7cm.
