LOT 690

A 9ct gold uniform curb link watch Albert chain, fitted with two 9ct gold swivels and a 9ct gold T-bar, each with maker's mark 'B&S', weight 12.9g, length 36cm (T-bar detached).

Estimate: £160 - £190

Condition Report

Currently the T-bar is detached, we do not see a reason why it could not be reattached professionally.

Assay office is Birmingham, date letter for 1902. This is located on the additional loose ring half way along the chain, which probably supported the T-bar at one stage.

The swivels do have a rose hue to them, but under 10x magnification show a yellow coloured gold underneath, so perhaps this is an overgilding. The swivels, T-bar and chain are all marked for the same maker B&S, so we imagine they started life together.
