LOT 1019

A Tibetan carnelian dzi bead mala necklace, comprising one hundred and seven irregular bun shaped beads with white banded decoration, and a banded agate marker bead, total length 124cm, diameter of beads ranging from 1.4cm to 1.7cm. Provenance: the Alain Presencer Collection.

Estimate: £300 - £500

Condition Report

1019. The necklace is in generally good condition. Typical surface scratches and wear but no significant damage or repairs. Some black/darker marks to some of them but generally fairly uniform colour to beads. The online images give a fair reflection of the necklace and using the close-up feature gives good detail of the darker inclusions.
