

### LOT 2535

An early 20th century Continental triple singing bird automaton, comprising three moving feathered birds within a domed wirework cage, raised on a giltwood base ornamented with flower-filled baskets and acanthus leaves, height 53cm, width 24cm, together with winding key.

Estimate: £500 - £800

---

### Condition Report

2535. All three birds move their heads, two moving their beaks and the two smaller birds move their tail feathers. The singing seems to be working fine. The birds have some deterioration to the feathers.
