LOT 2140

A set of thirteen Regency stained beech and mahogany dining chairs with upholstered backs and drop-in seats, on sabre legs, comprising two carvers, height 81cm, width 54cm, and eleven standards, height 84cm, width 47cm (alterations and restoration).

Estimate: £200 - £400

Condition Report

2140. Among the set there are beech framed chairs, including the two carvers and a few standards, but they appear to be the same design and period as the mahogany examples. The beech framed chairs have been re-stained and varnished, so do not have their original patina. Overall, there are some leg joint repairs and some replaced seat rails.

All the chairs would have originally been caned but have been converted to take drop-in seats. Some of the braiding is loose and structurally the chairs are reasonably ok.

Seat height 46cm.
