Condition Report

619. The brooch is in fair condition but is generally a little worn. Typical surface scratches and wear. A few sapphires are chipped and have surface abrasions, and would appear to be missing a small section of setting and a stone to the very top of the brooch. Otherwise all other stones are present. Solder repair to back where pin later attached, possibly originally a pendant?

is a bit dirty and would benefit from a clean.

Stick pin with small solder where front meets pin, otherwise generally good condition with typical light surface scratches and wear.
