### Condition Report

The ruby has some general wear, scratching and abrasion to it.

It is highly likely that one or two of the diamonds have been replaced in the past, as there is a variety of cuts to the stones.

One diamond has more of a yellow tint to it compared to the others.

Some wear to claws which may require attention, some claws have been re-tipped in the past.

Some wear to the sides of the setting and to the shank.

Typical light scratching to the metal overall.
