

British and Continental Ceramics / Thursday, 30th April 2026 / Lot 1504

LOT 1504

A Staffordshire pearlware figure of a cow and her calf, early 19th century, the standing cow and calf with black and raspberry sponged decoration, on an oval base with green spot and black sponged detail, height 13.2cm, length 19.2cm (minor faults), together with a similarly decorated pearlware cow creamer and milkmaid group, on a green cut cornered rectangular base, height 14cm, length 16cm (minor restoration and faults).

Estimate: £100 - £200

Condition Report

Cow and calf - typical overall fine crazing to the glaze. Approx 2cm long chip to inner edge of base, not really noticeable when on a flat surface, and similar smaller chip to inner edge of base too. Cow with small chip to tip of right ear and some minor firing cracks to body, nothing terrible or untoward. Calf in good condition.

Cow creamer and milkmaid - typical overall fine crazing to the glaze, lacking cover. Approximate 0.5cm square flat glaze chip to outer front edge of base and other minor nibbles/frits to edge of base overall, one udder chipped away, left horn restored, milkmaid with firing crack to right arm and milkmaid overall poorly decorated/with lack of definition - a manufacturing issue.
