LOT 537

A gold and jade pendant necklace, the front mounted with a spherical jade bead above a chain supporting a jade carved as a gourd, on a gold neckchain, detailed '9c', with a boltring clasp, detailed '15ct', diameter of bead 2.1cm, length of gourd 3.1cm, total weight 29g.

Estimate: £80 - £120

Condition Report

The spherical bead has some naturally occurring internal cracking, majority running around the circumference of the stone.

Neither piece of jade has any noticeable chips.

There is some reaction under a UV light, which in our opinion may highlight waxing rather than dyeing, but we cannot be 100% certain.

The chain is in fair condition, there are some signs of wear between links.
