LOT 2115

An impressive 19th century giltwood overmantel mirror, the rectangular frame with half-round reeded borders cornered by acanthus leaf crests, height 146cm, width 193cm. Provenance: from the estate of a Sussex gentleman.

Estimate: £300 - £500

Condition Report

2115. The bottom section of frame is detached so currently the backboard, plate glass and lower frame section are all detached. The frame itself only has some fairly minor surface knocks, with some small pieces of tilt and gesso scuffed and lost.

It could probably be set back into place reasonably easily and then once attached to a wall it would be fine.
