Condition Report

Overall fine typical crazing to the glaze.

There is an approximate 3cm long vertical haircrack running from the top rim edge which has a tiny minuscule slither chip from where it emanates on the rim, it is visible to the interior and exterior, and also amidst the crazing there are some more defined craze lines visible around the rim.

The bowl interior is quite scratched and the glaze here has some marks and blemishes which may or may not clean off.

Light brown staining visible to the unglazed underside.
