

LOT 756

An Edwardian 18ct gold ring, mounted with a row of five graduating half-pearls, Birmingham 1902, weight 2.3g, ring size approx L.

Estimate: £100 - £150

Condition Report

Both end pearls are showing signs of peeling/cracking.
The pearls we believe are natural, two pearls have pink/orange overtones, the others silvery.
Claws in fairly good condition.
Some thinning to the back of the shank and it has been resized in the past, this is fairly noticeable.
The ring would require a careful professional clean.
Some slight wear to the signs of the mount
Typical scuffing/scratching to the gold.
