

LOT 2509

A late 18th/19th century Continental cast bronze figure group of a child on the back of a large dog wearing an ornate collar, raised on a rectangular marble plinth, length 16.5cm.

Estimate: £100 - £150

Condition Report

2509. Some minor chips to edges of plinth, but otherwise just some minor surface wear to high points. The figure is loose on the back of the dog and is probably missing a small locating pin to hold in place, but it does sit in place without a problem.
